Timberguard™ Mousse

For the Maintenance of Garden Furniture and Decking

VOC 2010 compliant

Timberguard Mousse is an easy to use maintenance foam based upon our popular Timberguard Exterior Oil.

The mousse contains an active UV-inhibitor, slowing down the bleaching effect from harmful UV-radiation from the sun. The mousse also contains natural biocides which will protect the wood from fungus and algae.

The surface will be touch-dry within an hour and will become water-resistant after 24-48 hours.

The Finest Natural Protection

Timberguard™ Mousse

For the Maintenance of Garden Furniture and Decking

AVAILABILITY

Available in 150ml.

COVERAGE

20m2 - 30m2 per tin (ca. 4 chairs and 1 table).

TOOLS

For application on wood garden furniture
A soft sponge (kitchen sponge)
A cotton cloth
A pair of plastic or latex gloves

For application on decking
A soft nylon pad
A cotton cloth
A pair of plastic or latex gloves

SURFACE PREPARATION

Punch down any nails or screws and fill any small holes or imperfections with proprietary coloured wood filler (plastic wood) and leave to cure, Surfaces should be free from any barrier to penetration. Application should be avoided in direct sunlight.

APPLICATION

1. Clean the surface using Timberex Bio-C Cleaner. Clean the surface thoroughly and let dry.
2. As soon as the surface is dry, treatment with Timberguard Mousse can begin. Apply a small amount of mousse directly onto the surface using a sponge, nylon pad or cloth. Rub the oil into the surface and repeat if necessary in intervals of 20 minutes.
3. After the final application, remove ALL surplus oil from the surface. Wait another 30-45 minutes before final buffing using a cotton cloth until a satin matt finish has been achieved.
4. IMPORTANT: Ensure that all applicators and cloths impregnated with the oil are placed in a bucket filled with water immediately after use. See section SAFETY INFORMATION for further instructions.

CLEANING AND MAINTENANCE

The surface will gradually become more water-resistant with time. Avoid any spillages for the first 24 hours. Use Timberex Bio-C Cleaner for cleaning. Maintenance with Timberguard Mousse follows the instructions given above and we recommend to re-apply once a year or when needed for optimal protection of garden furniture and decking.

ORDERING

Available through selected distributors and retailers worldwide. All products are sold subject to the company's standard conditions of sale. See www.timberex.com for your nearest Timberex dealer and for further product details.

SAFETY INFORMATION

All applicators and cloths impregnated with the product should be placed in a bucket of water and placed outside to eliminate the small possibility of spontaneous combustion. The contents must be disposed according to local regulations. The Company and its representatives are often asked to comment on the potential uses of Timberex products which differ from those described in the Company's data sheets. Whilst in such cases the Company and its representatives will always try to offer helpful and constructive advice, the Company cannot be held responsible for the results of such uses unless they are specifically confirmed in writing by Timberex International.
